| 13:20 - 14:10    | Panel Discussion and Q&A             | Irene Norstedt  
Director, People Directorate  
DG Research and Innovation  
European Commission  
Erik Van der Eycken  
Expert by Experience  
EU Research Project Officer  
GAMIAN - Europe  
Joke Jaarsma  
President  
European Federation of Neurological Associations  
Tomislav Sokol (HR, EPP)  
Member of the European Parliament |
|                  | **Moderated by:**  
Frédéric Destrebecq  
Executive Director  
European Brain Council |
| 14:10 - 14:15    | Concluding Remarks                   | Hilkka Kärkkäinen  
President  
GAMIAN - Europe |
Patient engagement in research is an approach that involves meaningful and active collaboration with patients in the governance, priority setting, conducting and knowledge translation of research. While patient engagement is becoming increasingly popular and vital prerequisite in research projects, many researchers are still unsure or hesitant in the involvement of patients in their work and why such engagement is of value. The process is unclear to many and how to fully involve patients can be unclear. However, many patients are keen to be part of research – “nothing about us without us” – arguing that no research can be fully done without direct insight from the people actually living with these conditions every day.

For some time now, the European Commission, through its research programmes and related initiatives, has been increasing its encouragement of involving patients in research, particularly within the projects it funds. The Responsible Research and Innovation (RRI) approach has been highlighted throughout the objectives of the EU Horizon 2020 Programme. In health research this means to put the expectations of patients and society at the heart of research programs. European initiatives such as the Innovative Medicines Initiative (IMI) have spearheaded the growth of involving patients in European research, encouraging patient involvement in their activities and project, and involving patients as speakers and panellists in their events and consultations. Furthermore, H2020-funded projects such as MULTI-ACT were launched with the aim to increase the impact of health research on people with brain diseases and to create and implement a new model allowing for the effective cooperation of all relevant stakeholders.

However, most patients and patient representatives still feel like not enough support is given to have their voices fully heard in research—requests and demand for involving patients is growing but a pool of “patient experts” is still lacking. The discussion needs to shift from “we need to show that patients are on board” to “how can we best involve patients and why/how are we involving them to the full benefit for the research conducted”. “What can be done concretely in EU funded health research projects to enforce patient engagement”? This needs to be more than a “box ticking exercise”.

This Brain Awareness Week looks to explore the current state of patient engagement in EU-funded Brain Research projects, looking at IMI and MULTI-ACT as concrete examples and solutions and analysing in discussion with key officials what has been done and what can still be done in order to guarantee change.
Speakers’ biographies

**Joke Jaarsma**  
President, European Federation of Neurological Associations  
Treasurer, European Brain Council

Joke Jaarsma is EBC Treasurer and President of the European Federation of Neurological Associations (EFNA). In 2009 she started the European Alliance for Restless Legs Syndrome, an organization which now represents all major European patient groups for RLS. She still works with them as Director of External Relations. Furthermore, she also is a member of several scientific panels at the European Academy of Neurology.

In her working life, Joke Jaarsma was senior publisher at one of the major science publishers. She joined the Dutch Restless Legs Syndrome (RLS) patient association in 1999, and she is still active as Vice President of the Dutch group.

Having finished full-time paid employment, she decided to spend her retirement in helping give neurology patients a strong and collective voice.

**Monica Di Luca**  
President, European Brain Council

Monica Di Luca, EBC President, is Professor of Pharmacology and Head of Laboratory of Pharmacology of Neurodegeneration – DiSFeB at the University of Milano.

Her primary research interest is related to synaptic plasticity in physiological and pathological conditions, with the primary aim to apply basic findings to the cure of neurodegenerative diseases such as Alzheimer’s and Parkinson’s Disease.

She has been member of Council of several national and international scientific organizations including Federation of European Neuroscience Societies (FENS, President 2014-2016), the International Brain Research Organization (IBRO), EMBO and the European Dana Alliance for the Brain (EDAB).

**Irene Norstedt**  
Director, People Directorate, DG Research and Innovation, European Commission

Irene Norstedt works at the European Commission where she is the Director responsible for the People Directorate within the DG for Research and Innovation.

Irene has been at the European Commission since 1996, and was instrumental in the creation of the Innovative Medicines Initiative (IMI) in 2008. From 16 December 2014 to 15 September 2015, Irene served as Acting Executive Director of the Innovative Medicines Initiative.

Prior to joining the European Commission, she worked for the Swedish life science company Biacore AB and at the Swedish embassy in London. Irene studied biotechnology and polymer science, and holds a Master of Science (MSc) in Chemical Engineering.
Erik Van der Eycken
Expert by Experience/EU Research Projects Officer, GAMIAN-Europe

As EU Research Project Officer at GAMIAN Europe and expert by experience in mental health, Erik Van der Eycken is active in various EU funded research projects. As a person with lived experience, he has a liaison function between national patients organisations as members of GAMIAN Europe. He is involved in the operation of the ‘MEP-Alliance for Mental Health’ in the European parliament. Erik is board member of the Belgian patients association “Ups & Downs” (bipolar disorder & chronic depression) and participates in governmental steering committees on mental health care in Flanders.

Pierre Meulien
Executive Director, Innovative Medicines Initiative

Pierre Meulien is Executive Director of the Innovative Medicines Initiative (IMI), a €5 billion public-private partnership between the European Union and the European pharmaceutical industry. At IMI, he is responsible for the overall management of the program, which works to improve and accelerate the drug development process by facilitating collaboration between the key players involved in health research. Previously, Dr Meulien was president and CEO of Genome Canada, where he raised money and oversaw the launch of novel projects and networks in the field of genomics-based technologies. Prior to that, he was chief scientific officer for Genome British Columbia and was the founding CEO of the Dublin Molecular Medicine Center. Dr Meulien also worked with the French biotechnology company Transgene and with Aventis Pasteur (now Sanofi Pasteur). He has a Ph.D. in molecular biology from the University of Edinburgh and carried out a postdoctoral fellowship at the Institut Pasteur in Paris.

Paola Zaratin
Project Coordinator, MULTI-ACT

Frédéric Destrebecq is the Executive Director of the European Brain Council since October 2014. In this capacity, he is responsible for providing strategic direction and leadership while managing the day to day operations of EBC and its ongoing relationships with its member associations and other stakeholders, as well as representing the organisation in various European and national forums.

Prior to this position, Fred served the European Union of Medical Specialists (UEMS) as Chief Executive Officer, and previously as Director for European Affairs. Fred holds a Master Degree in Political Science and International Relations from the Université Catholique de Louvain (Belgium). He also studied at the Institut d’Etudes Politiques (Paris) and University of Wales College (Cardiff), in the framework of the former EU Socrates exchange programme.

Patrik Vankrunkelsven is the Director of the Belgian Centre for Evidence-based Medicine, an independent, and multidisciplinary medical scientific body working with healthcare providers, patients and healthy citizens.

Tomislav Sokol was born in Zagreb in 1982. He obtained his first degree in law at the Faculty of Law, University of Zagreb, in 2006, magna cum laude. He then obtained a Masters of Law (LL.M.) specialising in European Union Law at the Katholieke Universiteit Leuven (KUL), Belgium, in 2009, magna cum laude. He defended his PhD at KUL, dealing with free movement of cross-border health care services in the EU and its impact on national health insurance systems in 2014.

During his studies, in 2004, Tomislav Sokol became a Member of the Croatian Democratic Union (HDZ). He climbed the party ranks during the next decade, always emphasising on Christian Democratic values as the cornerstone of its identity. He was an Assistant Minister in the Ministry of Science and Education, after which he became a Member of the Croatian Parliament. He was a Member of the Croatian Parliament until July 2019, when he became a Member of the European Parliament. He is a Member of the Committee on the Internal Market and Consumer Protection and a Substitute Member of the Committee on Regional Development.

So far, he has published around 20 papers and 1 book on issues concerning EU law, including several articles in European journals, such as the European Law Review and the European Law Journal. He has presented papers at many international conferences, worked on different research projects and is currently taking part in a Jean Monnet project related to EU health law and policy. Previously, he worked in a legal practice and is currently a Senior Lecturer at the Zagreb School of Economics and Management where he has taught Introduction to European Union and Principles of Law courses since the academic year 2010/2011. He is also an assistant professor at the Catholic University of Croatia where he has taught since the academic year 2016/2017. His areas of professional interest include the law of the European common market, EU health law, competition law, International and European social law and International and European trade law.
Hilkka Kärkkäinen
President, GAMIAN - Europe

Hilkka is a social worker by profession and she has retired from her job as Social Ombudsman in Sosiaalitaito in 2014. She is also a patient and an expert by experience having suffered reactive depression in 2002. She has worked both for the City of Helsinki and the City of Espoo in Child Welfare several years. Hilkka was a Senior Social Worker in Probation and After Care Association in Helsinki for seven years. As an office manager in Espoo Social Services in 1980’s she was also in charge of a Horizon ECHO program for people with mental disorders. She was Executive Director of Finnish Central Association for Mental Health 1998-2002 and has been President and Vice President of Mielo Maasta, which is a patient association for those suffering from depression. She has worked for the City of Järvenpää as a Planner of Regional Mental Health Care. Hilkka was a Board Director of European Federation of Neurological Associations (EFNA) 2002-2004 and President of GAMIAN-Europe once before in 1999. She is a Board Director of European Brain Council (EBC), European Patient Forum (EPF) and European Psychiatric Association (EPA).
About Us

European Brain Council (EBC)

The European Brain Council (EBC) is a network of key players in the “Brain Area”, with a membership encompassing scientific societies, patient organisations, professional societies and industry partners.

A non-profit organisation based in Brussels, its main mission is to promote brain research with the ultimate goal of improving the lives of the estimated 179 million Europeans living with brain conditions, mental and neurological alike.

With the aim to speak with one voice, EBC stands as the platform to foster cooperation between its member organisations and other stakeholders, consistently promoting dialogue between scientists, industry and society. As showcased by its growing portfolio of projects, research and policy papers, as well as events, EBC emphasizes the importance of continued interaction with the European Institutions to build strong European health policies, raising awareness and encouraging education on the brain and the repercussions of neurological and mental health conditions on society as a whole.

European Federation of Neurological Associations (EFNA)

The European Federation of Neurological Associations (EFNA) is an umbrella group representing pan-European neurology patient groups.

Our slogan ‘Empowering Patient Neurology Groups’ encapsulates our goals as an Association. We strive to add capacity to our members – allowing them to be the most effective advocates possible in their own disease specific areas.

EFNA embraces the concept of Partnership for Progress – working at a high level with relevant stakeholders from the fields of policy, medical, scientific/research, industry, patient partners and other key opinion leaders.

Global Alliance of Mental Illness Advocacy Networks-Europe (GAMIAN-Europe)

Global Alliance of Mental Illness Advocacy Networks-Europe (GAMIAN-Europe) is a non-profit patient-driven pan-European organisation, representing and advocating for the interests and rights of persons affected by mental ill-health. Our main activities include awareness-raising, education, and partnership and capacity building. Overarching themes in our work relate to anti-stigma, discrimination and patients’ rights.
